- VII. Appendix C – Existing 800 MHz Licenses
- VIII. Appendix D – Implementation Schedule
- IX. Appendix E – Signed Waivers

I. INTRODUCTION

As the sponsoring agency responsible to operate a new county-wide 700/800 MHz trunked interoperable radio system serving municipal, county and local public safety and non-public safety agencies, the Peoria County Emergency Telephone System Board (ETSB), in Peoria County, Illinois, is appointed to represent the communications needs and/or provide for interoperable radio communications for many public safety and non-public safety agencies within Peoria County that include approximately 90 agencies listed in Appendix A.

Many of these agencies, that account for over 1,500 radios operating within the geographic borders of Peoria County, who will migrate to the new county-wide emergency communication system, hereby respectfully requests that the Federal Communications Commission (“Commission” or “FCC”) grant a waiver of 47 C.F.R. § 90.209(b), specifically the requirement to convert 78 FCC radio authorizations (listed in Appendix B) operating within Peoria County, Illinois to a bandwidth of 11.25 kHz or less by the date of January 1, 2013.¹ We are requesting a waiver to June 30, 2014, at which time the ETSB will cancel and return to the pool, frequencies no longer needed by the ETSB or narrowband accordingly, any equipment and frequencies that will be maintained by the ETSB.

II. BACKGROUND

The new county-wide radio system will be operated and managed by the ETSB which was formed in 1990 by Illinois Compiled State Statue 50 ILCS 750/ (Emergency Telephone System Act) and Peoria County Ordinance 1-9-90, § 1 (Establishment of Emergency Telephone System Board). The fifteen (15) member Emergency Telephone System Board is appointed by the Peoria

¹ See *Implementation of Sections 309(j) and 337 of the Communications Act of 1934 as Amended, Third Memorandum Opinion and Order, Third Further Notice of Proposed Rule Making and Order, WT Docket No. 99-87, 19 FCC Rcd 25045, 25051-52 ¶¶ 12-13 (2004) (requiring most PLMR licensees in the 150-174 MHz and 421-512 MHz bands to migrate to 12.5 kHz technology by January 1, 2013) (Narrowbanding Memorandum Opinion and Order); see also 47 C.F.R. § 90.209(b)(5).*

County Chair with advice and consent by the County Board, with representation from Police Departments, Fire Departments, Fire Districts, Emergency Medical Services Providers, Emergency Services and Disaster Agencies and one (1) public member.

In 2006, the ETSB released a Request for Proposals for the procurement of a county-wide, interoperable radio system for all public safety first responders and non-public safety service providers in the county. On September 27, 2007, the ETSB entered into a contract with Harris Corporation for a new digital interoperable radio system.

The Peoria County area, have within their borders different forms of local government; which range from local municipalities with their own services (police, fire, public works, etc.) to single purpose political subdivisions that include fire protection, ambulance, school, township and sewer districts.

The ETSB is the agency responsible for the implementation of the new system. During the past few years, the ETSB has been involved with the development of inter-governmental relationships and the design of the new system with our radio vendor. The system, as it stands today includes 25 transmit/receive sites strategically located throughout Peoria County. Peoria County has presented several challenges for the design team, including significant bluffs that traverse the Illinois River and other topographical conditions throughout our proposed radio coverage area. In the late 1800's and early 1900's, certain parts of the county were used for coal strip mining operations which has added additional challenges for the system design team.

With the design of the new system nearly completed, the ETSB is beginning the process of procuring the new twenty-seven (27) FCC NPSPAC, 700/800 MHz narrowband radio frequency spectrum as allocated in the FCC NPSPAC Regions 13 Planning Committees' 700 and 800 MHz frequency plans. The ETSB and the Peoria County Sheriff have already acquired thirteen (13)

800 MHz channels (Appendix C) that will also be used with the new system. The ETSB anticipates the new system will be completed and ready for operation on August 1, 2013 and cutover to the new system by user agencies completed by March 31, 2014.

III. REQUEST FOR NARROWBANDING WAIVER

The Peoria County ETSB and its member public safety and non-public safety agencies respectfully request that the Commission grant a waiver of the requirement to attain an efficiency standard of 12.5 kHz through the narrowbanding for the existing 78 VHF and UHF radio authorizations identified in Appendix B. The duration of this waiver is to the end date of the Implementation Schedule which is June 30, 2014 (Appendix D). That will permit an orderly transfer of the traffic load from those VHF and UHF stations to the new 700/800 MHz radio facilities. As the traffic is transferred, the radio authorizations for the underlying VHF and UHF channel-frequencies vacated will be cancelled or narrowbanded appropriately through the appropriate FCC filings. As required, the agencies that are participating in the waiver request, who hold a UHF or VHF license have signed an acknowledgement form indicating their desire to participate in the waiver and comply with the terms of the waiver (Appendix E).

Implementation project management of the new 700/800 MHz system will include tracking the prompt narrowbanding or cancellation of vacated VHF and UHF channel-frequencies. The new interoperable 700/800 MHz radio system will have the capability of efficiently accommodating future expansion on the NPSPAC and 700/800 MHz channels.

The ETSB and Peoria County agencies are aware of the high hurdle applied to a waiver of the Commission's rules and the requirement to clearly articulate the detailed considerations in

Section 1.925 of the Commission's rules.² We believe that this request complies with the submission details of the waiver process in that:

1. The underlying purpose of the narrowband rule would not be frustrated by waiver of this case. The waiver request does not extend the date for reduction of bandwidth to a lengthy or indefinite date, but asks to extend the requirement for a finite period of time to permit the establishment of a new interoperable region wide network. The basis for narrowband is to make additional spectrum available in the VHF and UHF band. This goal will be accomplished when the county public safety and non-public safety agencies move to the new system and completely cancel all UHF and VHF licenses that are no longer required.
2. The grant of the waiver will be in the public interest. The cost of narrowbanding is an expense that competes with the need for an improved, interoperable communications network at a time when the economy shortage of tax dollars limits the expansion of funding sources.
3. Unique and unusual factual circumstances indicate the application of the rule would be unduly burdensome to the Peoria County ETSB and user agencies and contrary to the Public Good. The Peoria County ETSB had hoped that the new multi-agency interoperable system would be in operation prior to the January 1, 2013 narrowband transition date. As with many large, complex systems involving multi-jurisdictional agencies, the timing was delayed. To this is added the economic downturn, which has constrained state, county, and local governments from committing funds to purchase subscriber units for the new system. Many of the participating agencies have now dedicated funding for the implementation and operation of the new system. A new multi-agency, county-wide, interoperable system is a unique endeavor unto itself and will

² 47 C.F.R. § 1.925.

provide an example of what can be accomplished through cooperative efforts between the Peoria County ETSB and local public safety and non-public safety agencies. We have moved in this direction with the encouragement and at the behest of the Department of Homeland Security who has recognized its value through a Public Safety Interoperable Communications (PSIC) Grant, and a pending Grant submitted through the FEMA Fire Grant program. Grant of the waiver as described above for each of the 78 VHF and UHF radio authorizations (listed in Appendix B) would therefore be in the public interest.

IV. CONCLUSION

Under Section 1.3 of the Commission's rules³ the Commission may exercise its discretion to waive a rule for "good cause shown."⁴ A waiver is appropriate if special circumstances warrant a deviation from the general rule and such deviation will help serve the public interest.⁵

The waiver process allows the Commission to "maintain the fundamentals of principled regulation without sacrifice of administrative flexibility and feasibility."⁶ In deciding whether or not to grant specific waiver requests, the Commission has indicated it must "take into account considerations of hardship, equity, or more effective implementation of overall policy" in its broader quest for regulation in the "public interest."⁷ As explained below, granting of the ETSB's request on behalf of the public safety and non-public safety licensees would serve policy

³ 47 C.F.R. § 1.3.

⁴ *Implementation of the Local Competition Provisions of the Telecommunications Act of 1996; Petition of Southwestern Bell Telephone Company, Pacific Bell, and Nevada Bell for Expedited Declaratory Ruling on Interstate IntraLATA Toll Dialing Parity or, in the Alternative, Various Other Relief*, Order, 14 FCC Rcd 6806, ¶ 11 (1999).

⁷ *Id.*

objectives of the Commission, particularly the deployment of spectrum to meet public safety needs.

Narrowbanding the 455 channel-frequencies authorized by 78 radio authorizations, held by 36 unique FRN number licensees in Peoria County, would divert extensive financial, and human resources to work on radio units and stations that will be dismantled within twelve months of the completion of the new county-wide system. Because of the complexity with the Peoria County radio system, and large number of participants, the ETSB cannot fully deploy this 700/800 MHz interoperable system by the January 1, 2013 deadline for narrowbanding, requiring the ETSB and its partner public safety and non-public safety agencies to narrowband, then subsequently have the newly narrow-banded systems decommissioned within a few months appears counter to the public interest. Given the critical need for interoperable communications in Peoria County, and the ability to fully utilize the new system will improve interoperability, promote RF spectrum efficiencies, and reduce threats to the safety and lives of the Peoria County first responders and the health and property of the public they serve. Allowing the ETSB and its member public safety and non-public safety licensees to continue operating on the VHF and UHF frequencies in the wideband mode will further the Commission's goal of helping public safety provide the most effective and efficient communications for the American public.

Respectfully Submitted,

By: 
David Tuttle

VIII. APPENDIX D – IMPLEMENTATION SCHEDULE

The Peoria County ETSB has established the following schedule for the radio system project:

Begin Date	End Date	Task	Comments
7/15/2011	2/15/2011	Final system design and Statement of Work (SOW) revised.	Design being finalized.
8/1/2011	3/31/2012	Obtain remaining frequencies for the new system from the FCC.	Attended Region 13 meetings in August and November of 2011.
3/1/2012	8/15/2012	Order radio system equipment and have system assembled. Complete shelter construction.	Radio equipment will be ordered after SOW is approved.
9/1/2012	9/30/2012	Factory acceptance test of new radio system equipment.	Lynchburg, Virginia
10/1/2012	10/31/2012	Radio system shipped to Peoria County.	System to be shipped within 30 days of completing the factory acceptance test.
11/1/2012	5/31/2013	Radio system installed and optimized. Subscriber units ordered, delivered and programmed.	Includes gathering final radio counts from participating agencies.
6/1/2013	6/30/2013	System acceptance testing.	Includes drive test and in-building coverage testing.
7/1/2013	2/28/2014	End user training.	All end users to be trained on the system 30 days before their scheduled cutover.
8/1/2013	3/31/2014	System cutover.	Cut over agencies to the new system.
1/1/2014	6/30/2014	Abandon and/or narrowband legacy frequencies in accordance with FCC guidelines.	Complete all FCC required paperwork.

IX. APPENDIX E – SIGNED WAIVERS
